ebrc won the first EuroCloud Europe Award, Best Use Case in the Public Sector category
Paris, December 12th2011

Luxembourg, December 13th 2011

EuroCloud is the first pan-European network of SaaS and Cloud Computing participants, with a presence today in 27 European countries. EuroCloud promotes Cloud Computing in Europe, sharing best practices, encouraging innovation and extending business within Europe and beyond.
National & European EuroCloud awards were created to recognise those organisations that encapsulate the heart of this vision and highlight best practice within the industry.

Last May 19th 2011, EuroCloud Luxembourg has given local ICT companies recognition for their outstanding performance in Cloud services: **ebrc** won then the "Best Case Study for Public Sector Services 2011"award for its Cloud project with the IBBL.

EuroCloud has concluded its first pan-European Cloud Computing Awards in Paris on December 12th by delivering trophies in four categories - Best Startup, Best Solution, Best Use Case in the Public Sector and Best Use Case in the Private Sector.

The European Cloud Computing Award in the Best Use Case in the Public Sector category went to **ebrc**. The TrustedCloudEurope approach of **ebrc** at IBBL proved very innovating as an open, easy and secure method of access for all the healthcare stakeholders, in a very regulated environment. **ebrc** proves its TrustedCloudEurope solution is secure for the most sensitive information. **ebrc** also managed all aspects of the project to speed up its completion and relieve complexity.
